The third edition of the ASHRAE IT Equipment Power Trends book is meant to update the industry on what to expect in the coming years in terms of electrical power and cooling capacity required for future IT solutions. As with the previous editions, we had engineering professionals--many of them responsible for developing the products for which these power trends in this edition are created--update this datacom book. In 2005, the ASHRAE Technical Committee 9.9 (TC 9.9), Mission Critical ...

Now in its third edition, IT Equipment Power Trends [8] (formerly, Datacom Equipment Power Trends and Cooling Applications), contains the best-known hardware power trends through 2025. For the first time in the series, the power trends have been segregated by workload type. This is a significant change from previous editions that focused only on the power trends for servers of a given form-factor (i.e. 1U vs. 2U). By delineating the power trends by workload type, it provides the ...
