Social psychology is the scientific study of how the thoughts, feelings, and behaviors of individuals are influenced by the actual, imagined, and implied presence of others. In this definition, scientific refers to empirical investigation using the scientific method, while the terms thoughts, feelings, and behaviors refer to the psychological variables that can be measured in humans.

The self-concept, which is the knowledge of who we are, combines with self awareness to develop a cognitive representation of the self, called identity (Aronson, Wilson, & Akert, 2010, p.118). In other words, who we are is controlled by internal and external factors that combine to make us who we become. Add in new media outlets, such as the internet, and media is now considered an "extension ...

Compliance is a response—specifically, a submission—made in reaction to a request. The request may be explicit (e.g., foot-in-the-door technique) or implicit (e.g., advertising).The target may or may not recognize that they are being urged to act in a particular way. Social psychology is centered on the idea of social influence. Defined as the effect that the words, actions, or mere ...

Executive functions (EFs) make possible mentally playing with ideas; taking the time to think before acting; meeting novel, unanticipated challenges; resisting temptations; and staying focused. Core EFs are inhibition [response inhibition (self-control—resisting temptations and resisting acting impulsively) and interference control (selective attention and cognitive inhibition)], working ...
